

# Interactive HTML Annual Report

## “CLICK & GO” ONE CLICK NAVIGATION

IR Solutions documents offer our powerful “Click & Go” and easy-to-use navigation system. Your web site visitors can find any section of the financial document with just 1 click of the mouse.

## SEARCH CAPABILITIES

The IR Solutions Interactive HTML financial document allows text searching by keyword. Users of the Interactive HTML financial document find this feature essential for all online documents.

## ACCELERATED PAGE LOADING

Traditional PDF documents require special plug-ins and generally require a long time to download. Many investors do not have fast broadband connections to allow for fast downloads of large, bulky PDF documents. IR Solutions Interactive HTML documents load one page at a time, thus improving the experience for your shareholders, analysts, or other readers.

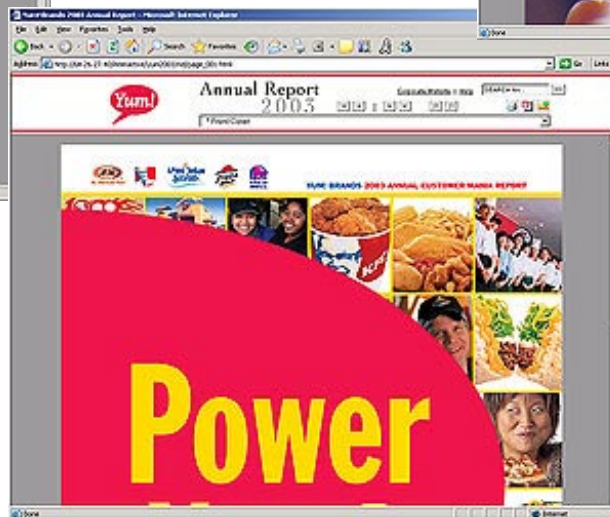

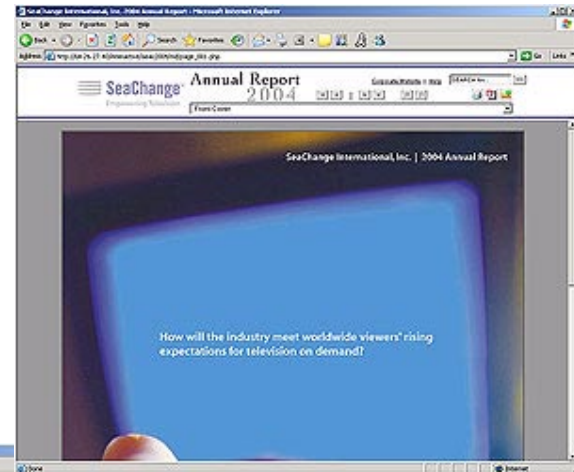

## EXACT REPLICA OF YOUR PRINTED REPORT

The IR Solutions Interactive HTML financial document is an exact match to the printed version. This benefit eliminates time-consuming proof reading which is usually associated with making documents available online.

IR Solutions has created a turn-key solution that has revolutionized the way investors interact with your financial documents – annual reports, 10K wraps, proxy statements, 8Ks, etc. Our unique conversion and distribution system makes your documents more portable than HTML and less bulky than PDF, while adding a number of other valuable features. Important information exists in your annual report, but can be very difficult for investors to access and locate when it is hidden inside a large PDF documents. The IR Solutions Interactive HTML Annual Report is fast becoming the standard for financial report publications online.

IR Solutions conversion service provides a wide range of benefits to corporations, shareholders, analysts, and others who visit corporate web sites. Our cost-effective interactive version of your financial report includes the following range of features:

- “Click & Go” Navigation
